Mrs. L. B. Miller is expected home to-morrow. She has been visiting relatives in Tacoma for the past two or three months.

Charley Voorhees, our genial night operator, is again pounding brass at the depot.

M. C. Dougherty, who relieved Mr. Alley during the holidays, left on Monday last for Mexico, having accepted a position as dispatcher on the Mexican Central road.

W. J. Copeman, who relieved Charles Voorhees, was a passenger on No. 1 Tuesday last for Needles, California, where he is to take third trick in dispatcher's office. Mr. Copeman was dispatcher at Williams when that office was abandoned.

Hon. F. T. Aspinwall and W. R. Hillman left for Los Angeles on the 2d. Mr. Aspinwall was on his way to Phœnix to attend the session of the forth coming legislature and Mr. Hillman on a vacation.

One of the first acts of Sheriff Wattron was to arrest an Indian for killing deer. We believe this to be the first arrest of an Indian for that offence and it may teach them a lesson. Frank says he intends to arrest every one he catches with either hides or meat.

Flagstaff wants Congress to grant them permission to issue bonds with which to build water works. The plans have all been perfected and the enterprising citizens of our sister city are only awaiting the sanction of Congress to begin work.

On the evening of December 29th, Mrs. John Pullar, assisted by Mrs. A. T. Cornish, of Flagstaff, and Miss Buchanan, of Holbrook, entertained quite a large number of their Winslow friends. The feature of the evening was a guessing contest prepared by the ladies. The answers to questions being in the language of some well known author. Afterward cards were indulged in. Altogether quite an agreeable evening was spent.

A lady asked a naughty editor how to make "not enough" out of the word "enough," and he told her that it was done by transposing the letters into words like this: Take the third, second and first of the word "enough" for the first word, and the sixth, fourth and fifth for the second word and you have two words that signify something that is not enough for any young lady.

It is rumored that the Atlantic & Pacific contemplate building a branch to the new mining camp, Randsburg. From Kramer, a station on its line, to the new mining town, the distance is twenty-five miles. Stages are now operating between these two points to connect with the trains of the company. The stage business is very good and the railway company has employed a leading mining expert to give a report on the probable growth and stability of the mining town. This report which is said to be favorable to Randsburg's prospects, has been submitted to C. W. Smith, who is managing the road in the interests of its New England bondholders. He is soon to confer with them about the report, and it is the general impression in railroad circles that within the next ten months the company will build a branch line out from Kramer. The company is very much in need of local business along its line, and it is believed will not miss this opportunity to develop its interests on the Mojave desert.

A Little Late BUT IN TOUCH WITH OUR SENTIMENTS.

We desire in this, the beginning of the new year, to sincerely thank our customers and friends for their generous trade and support in the year just past.

It shall be our aim, in the future, to improve our methods where we can, and to increase our facilities for supplying your wants more to your satisfaction. In order to do this successfully, we shall buy in car load lots direct, such goods as will make a saving to our customers and ourselves.

We have no thumb for your buttonhole, and no cheap prices on certain commodities, in order to entice you into our place of business. We rather like our old plan of "pay for what you buy and collect for what you sell," making an honest price on all goods to all people. Giving a square deal and asking in return for the same thing.

Upon this plan we respectfully solicit your patronage for 1897.

Wishing you prosperity and lots of luck for the new year.

We are yours respectfully,
BREED-RAND MER. CO.

La Grippe

If you have had the Grippe, you know its aches and pains, the fever, the chills, the cough, the depression—you know them all. The Grippe exhausts the nervous system quickly, lowers the vitality. Two things should be done at once:—the body must be strengthened, and force must be given to the nervous system. Cod-liver Oil will do the first; Hypophosphites the second. These are permanently and pleasantly combined in Scott's Emulsion.

It lifts the despondency and heals the inflamed membranes of the throat and lungs.

But you need not have LA GRIPPE.

You can put your system in a condition unfavorable to it. You can have rich, red blood; resistive strength; steady brain and nerves. Scott's Emulsion prevents as well as cures.

And whether you send or go for Scott's Emulsion, be sure you get the genuine.

10 years' written warranty with each machine.

A strictly high-grade Sewing Machine, finished throughout in the best possible manner. It possesses all modern improvements, and the mechanical construction is such that in it are combined simplicity with great strength, thus insuring ease of running, durability, and making it impossible for the machine to get out of order. It sews fast and makes a perfect stitch with all kinds of thread and all classes of material. Always ready for use and unrivalled for speed, durability and quality of work. Notice the following points of superiority:

The Head of the "Arlington" swings on patent socket hinges, firmly held down by a thumb screw. Strong, substantial, neat and handsome in design, and beautifully ornamented in gold. Bed plate has rounded corners and is inlaid or countersunk, making it flush with top of table. **Highest Arm**—Space under the arm is 5½ inches high and 9 inches long. This will admit the largest skirts, and even quilts. **It Is Self-Threading**—Absolutely no holes to put thread through except eye of needle. **Shuttle** is cylinder, open on end, entirely self-threading, easy to put in or take out; bobbin holds a large amount of thread. **Stitch Regulator** is on the bed of the machine, beneath the bobbin winder, and has a scale showing the number of stitches to the inch, and can be changed from 8 to 32 stitches to the inch. **Feed** is double and extends on both sides of needle; never fails to take goods through; never stops at seams; movement is positive; no springs to break and get out of order; can be raised and lowered at will. **Automatic Bobbin Winder**—For filling the bobbin automatically and perfectly smooth without holding the thread. Machine does not run while winding bobbin. **Light Running**—Machine is easy to run, does not fatigue the operator, makes little noise and sews rapidly. **Stitch** is a double lock stitch, the same on both sides, will not ravel, and can be changed without stopping the machine. **Tension** is a flat spring tension, and will admit thread from 8 to 150 spool cotton without changing. Never gets out of order. **The Needle** is a straight, self-setting needle, flat on one side, and cannot be put in wrong. **Needle Bar** is round, made of case-hardened steel, with oil cup at the bottom to prevent oil from getting on the goods. **Adjustable Bearings**—All bearings are case-hardened steel and easily adjusted with a screw driver. All lost motion can be taken up, and the machine will last a lifetime. **Attachments**—Each machine is furnished with necessary tools and accessories, and in addition we furnish an extra set of attachments in a velvet lined metal box, free of charge, as follows: One ruffler and gatherer, one binder, one shirring plate, one set of four hemmers, different widths up to ½ of an inch, one tucker, one under braider, one short or attachment foot, and one thread cutter. **Woodwork** of finest quality oak or walnut, gothic cover and drawers, nickel-plated rings to drawers, dress guards to wheel, and device for replacing belt.
